## Core Competencies

STP Ventures, LLC is a cybersecurity firm specializing in automated cyber-defense measures. Enabling organizations and government entities to better deliver their missions by providing 100% automated cyber hardening & defense measures, allowing for utilization of existing resources in other mission-critical areas as well as near-real-time action on global cyberthreat intelligence.

- Solves critical gap between intelligence and delayed human reaction
- Real time monitoring of global cyberthreat intelligence from numerous sources
- Threat database updated locally every 180 seconds. 480 times per day
- Easily integrates with any intelligence platform
- Highly Available deployment options
- Rapid deployment of preconfigured appliances in any environment
- Whitelist capability of mission-critical assets

## Differentiators

- Solutions developed based on real-world observations of cyber needs
- Understanding of global cyber-scape and how it translates to needs for end users
- Affordability of solutions
- Real automation, no touching or updating ever required
- Free up budget by automating critical tasks vs staffing SOC personnel for same deliverables
- Rapid deployment appliance in any environment
- 100% North Carolina based business
- Female owned small business
